that this play-field be enlarged and developed to provide for a modern play-field. We also recommend that other play-fields be established in various part of the city. If it is the intention of the school board to provide additional high schools, such play-fields should preferably be located at, or adjacent to, these high schools.

There has been considerable talk in Austin, as well as other cities, in regard to the race segregation problem. This problem cannot be solved legally under any zoning law known to us at present. Practically all attempts of such have been proven unconstitutional.

In our studies in Austin we have found that the negroes are present in small numbers, in practically all sections of the city, excepting the area just east of East Avenue and south of the City Cemetery. This area seems to be all negro population. It is our recommendation that the nearest approach to the solution of the race segregation problem will be the recommendation of this district as a negro district; and that all the facilities and conveniences be provided the negroes in this district, as an incentive to draw the negro population to this area. This will eliminate the necessity of duplication of white and black schools, white and black parks, and other duplicate facilities for this area. We are recommending that sufficient area be acquired adjoining the negro high school to provide adequate space for a complete negro play-field in connection with the negro high school. We further recommend that the negro schools in this area be provided with ample and adequate play ground space and facilities similar to the white schools of the city.
